

Duration: 0.5 Days Language: English

In this training you will learn how to create reports with Oracle® BI Publisher. The following contents from our module catalogue are covered in detail in the training. With the help of these module elements, the participants are introduced to efficient report creation and receive practical tips and tricks for their daily work in creating reports.

The training course covers the following topics

- Creation of data models
- Creation of queries
- Connection of data sources
- Linking of data sets (e.g. Excel data source with DB data source)

Participants

This training is aimed at Developers and Programmers who need to create EPPM BI Publisher Reports using Oracle® P6. The participants have very good SQL knowledge (DB dependent) and are familiar with database configurations, database connections and have a good understanding of relational databases. Extensive knowledge of the database schemas of the databases to be connected is required.

Coaches

All our coaches are experienced professionals in project management and have many years of practical experience in a wide range of industries. They have long-standing know-how within the relevant topics.

Training Method

The basics and functions of Oracle® BI Publisher are clearly conveyed through lectures, exercises, and practical examples. Targeted application exercises guarantee a direct practical transfer of what has been learned.

Training Setup

Our courses are available as open training courses (online or on-site). Would you like to book a training course that is tailored specifically to your needs? We are also happy to offer you a customized individual training course. Simply send us your request, and we will prepare your individual offer and support you with the organization.
