

## Success Factor Resource Planning

**Duration:** 1 day **Language:** German **Location:** upon agreement

A balanced resource planning is becoming more and more important for the successful realization of projects and has become one of the most important success factors for projects. This workshop / seminar deals with the planning and the resulting analysis possibilities of human resources.

The challenge of resource planning is not the planning of resources itself, but rather the statement of the expected resource evaluation over a project, an area or an entire company.

After this workshop / seminar you will be able to set up a structured resource planning and implement it in your project, department or company.

### Content

In this workshop / seminar you will learn about different methods of resource planning. Together we will work out the requirements and the advantages and disadvantages of each method.

### The workshop / seminar contains the following elements:

- What are the goals and expectations of resource planning?
- Report Definition - Which evaluations with which statement are available?
- Definition of resources - How are resources meaningfully represented?
- Establishment of a meaningful resource structure - What makes sense and what causes additional work?
- Availability of resources - Dynamic definition or fixed values?
- Generic resources - What does this mean in practice?
- Planning methods of resources - Which method is the right one?
- Process for resource planning - Which process is realistic and brings added value?
- Reporting - Periods, granularity, interpretation

### Participants
